EXHAUST

The King of Sound.™

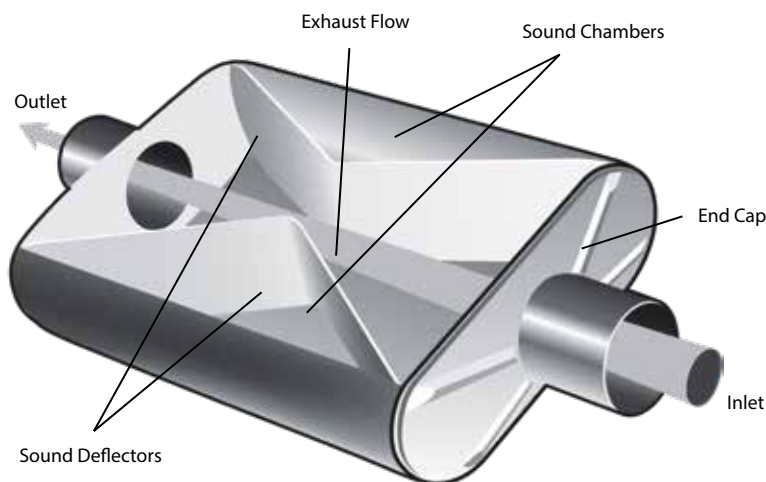

BLACK WIDOW EXHAUST

Black Widow Exhaust's™ design was developed with the intention of creating that classic '60's circle track stock car 180° header sound. That unique and classic sound was achieved, but ultimately, we designed a universal muffler that can be used on almost any vehicle with 4 wheels*.

With an ideal balance between exhaust velocity and exhaust volume using acoustic sound wave deflection, our internal design achieves distinctive sound characteristics unlike any other performance muffler on the market.

OUR DESIGN

Black Widow's patent pending high-velocity hourglass design compresses exhaust going in and forces exhaust going out – creating an ideal balance between exhaust velocity and exhaust volume, thus reducing opportunity for drone and creating that aggressive Black Widow Exhaust sound.

Note: The diagram above is for illustration purposes to show airflow.
All Black Widow Exhaust mufflers are bi-directional.

THE BENEFITS

- Crisp, clean and aggressive sound
- Straight through design allows for maximum horsepower
- Universal 2.5", 3" and 3.5"* and 4"* sizes for almost any application
- Constructed out of quality stainless steel
- Consistent sound throughout the life of the muffler
- Backed by a Limited Lifetime Warranty (See warranty details at www.blackwidowexhaust.com/technical/warranty)
- All Black Widow Exhaust mufflers are bi-directional

* 3.5" and 4" available for Race Venom, Angry Housewife, Neighborhater and Widowmaker mufflers only.

The King of Sound.™

Black Widow Exhausts' mufflers were designed without the droning characteristics that packed and chambered mufflers produce. Although multiple factors contribute to the creation of drone such as placement of muffler, size of piping, length of tailpipe, etc., we stand behind our design that drone is less likely to be created with the use of our muffler than with than with our competitors' products. Along with that, our mufflers produce, what we consider to be, "the ideal sound for your vehicle*!"

* Sound is subjective. We do not guarantee that your vehicle will sound exactly as expected.

Overall Length: 21 3/4"
Inlet/Outlet Length: 2" (each side)
Material: 409 Stainless Steel
Bi-Directional

Size **DOES** matter when we're talking about mufflers. Black Widow's Big D muffler is in a class of it's own at almost 22" long and width of 7 1/2". If you're looking for that aggressive Black Widow sound but require a bigger footprint, the Big D is here!

Part #'s BWBIGD-35 (3.5") / BWBIGD-4 (4") / BWBIGD-5 (5")

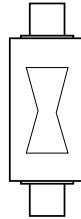

Widowmaker

Our most aggressive muffler yet, the Widowmaker is simply for those who demand attention. An alternative to a straight pipe setup, Black Widow Widowmakers manage sound and reduce the opportunity for drone.
